

Product Requirements Document

What we are building, for whom, and how we will know it works

Project	Course Enrollment Platform (courses: Digital Marketing, SEO, Content Writing, Web Development)
Version	1.0 (Draft for developer review)
Audience	Development team, project owner, and QA

1. Purpose and Vision

The Course Enrollment Platform is a website where prospective students can discover what the institute teaches, read the detail of each course, create an account, and enroll and pay online. The owner and staff manage courses, batches, students, and payments from a secure admin panel, without needing a developer for day-to-day work.

Vision: a trusted, fast, mobile-first website that turns a curious visitor into an enrolled student in under five minutes.

2. Goals and Success Metrics

Goal	Metric	Target (first 6 months)
Increase enrollments	Visitor-to-enrollment conversion rate	3% or higher
Reduce manual work	Enrollments needing staff help	Under 10%
Fast experience	Google PageSpeed (mobile)	90+
Organic visibility	Course pages ranking on page 1 for brand + course terms	All 4 course pages
Retention of leads	Contact form and WhatsApp leads answered within 24 hours	95%

3. Users and Personas

Persona	Description	Main needs
Prospective student	18-35, mostly on a phone, comparing institutes	Clear course info, fees, schedule, trust signals, easy enrollment
Enrolled student	Has an account and one or more enrollments	See schedule, payments, announcements, receipts, certificates
Working professional	Wants evening or weekend batches	Flexible timings, online mode, installment option
Admin / Owner	Runs the institute	Manage courses, batches, approve payments, see revenue

Persona	Description	Main needs
Staff	Front-desk or support team	Handle enrollments and messages with limited access
Instructor	Teaches one or more batches	See own batches and student lists

4. Scope

4.1 In scope (Version 1)

- Public marketing site: Home, Courses, Course Detail, About, Instructors, Contact, FAQ, Blog, legal pages
- Student registration, login, email verification, password reset
- Enrollment flow with online and manual payment options
- Student dashboard with enrollments, payments, receipts, and certificates
- Admin panel with role-based access
- SEO foundations, analytics, and email notifications

4.2 Out of scope (planned for later)

- Recorded video lessons, quizzes, assignments (full LMS)
- Live class hosting inside the site
- Native mobile app
- Multi-language (English and Urdu) content switching

5. Courses

Course	Summary	Typical topics
Digital Marketing	Plan and run online marketing campaigns	Social media, paid ads, email marketing, analytics, strategy
SEO	Rank websites on search engines	Keyword research, on-page, off-page, technical SEO, local SEO, tools
Content Writing	Write for web, brands, and clients	Blogs, copywriting, SEO writing, editing, freelancing basics
Web Development	Build and launch websites	HTML, CSS, JavaScript, WordPress or a framework, deployment

Courses are stored as database records, so the admin can add or change courses without code changes.

6. Functional Requirements

Priority key: **M** = Must have, **S** = Should have, **C** = Could have.

ID	Requirement	Pri.
F-01	Visitors can browse all published courses with search and filters (category, level, duration).	M
F-02	Each course page shows title, description, outcomes, curriculum, duration, mode, level, fee, instructor, prerequisites, seats, FAQs, and reviews.	M
F-03	Users can register and log in with email and password; email verification is required before enrolling.	M
F-04	Users can reset a forgotten password by email link.	M
F-05	A student can select a course and an open batch, and submit an enrollment.	M
F-06	Payment by bank transfer with receipt upload, with an admin approval step.	M
F-07	Online payment through a gateway (JazzCash, Easypaisa, card).	S
F-08	Auto-generated receipt or invoice for every confirmed payment.	M
F-09	Student dashboard: my courses, status, payment history, batch schedule, announcements, profile.	M
F-10	Certificate (PDF) generated when admin marks a course completed.	S
F-11	Only enrolled students can leave a course review; admin moderates reviews.	S
F-12	Contact form with email notification to staff, plus a WhatsApp click-to-chat button.	M
F-13	Admin can create, edit, publish, unpublish, and delete courses, batches, instructors, FAQs, and testimonials.	M
F-14	Admin can view, search, and export students and enrollments to CSV or Excel.	M
F-15	Admin dashboard with counts of students, new enrollments, pending payments, and revenue.	M
F-16	Role-based access: Super Admin, Admin/Staff, Instructor.	M
F-17	Blog module with SEO fields, managed from admin.	S
F-18	Email notifications: verification, enrollment received, payment confirmed, batch reminder.	M
F-19	Installment payments for a single enrollment.	C
F-20	Discount coupons and referral codes.	C

7. Key User Stories

- As a **visitor**, I want to compare courses quickly so that I can decide which one fits me.
- As a **student**, I want to enroll and pay from my phone so that I do not need to visit the office.
- As a **student**, I want to download my receipt and certificate so that I have proof for my records.
- As an **admin**, I want to approve a bank-transfer payment so that the student is confirmed in the batch.
- As an **admin**, I want to add a new batch in a minute so that admissions can open on time.
- As an **instructor**, I want to see the students in my batch so that I can prepare and take attendance.

8. Business Rules Summary

- An enrollment is created as **Pending** and becomes **Confirmed** only after payment is verified.
- A batch cannot exceed its seat capacity; a full batch shows "Full" and can offer a waiting list.
- A student cannot enroll twice in the same batch.
- Refunds follow the published Refund Policy; all refunds are recorded by admin.

- Certificates are issued only for completed enrollments.

The full rulebook is in the *Project Rules* document.

9. Non-Functional Requirements

Area	Requirement
Performance	Pages load in under 3 seconds on 4G; PageSpeed mobile score 90+; images compressed and lazy-loaded.
Availability	99.5% monthly uptime; daily automated backups with 30-day retention.
Security	HTTPS everywhere, hashed passwords, protection against SQL injection, XSS, and CSRF, rate limiting, role-based access.
Compatibility	Latest two versions of Chrome, Safari, Edge, and Firefox; Android and iOS browsers.
Responsiveness	Mobile-first layouts from 360px width upward.
Accessibility	Readable fonts, sufficient contrast, keyboard navigation, alt text (WCAG 2.1 AA as a target).
SEO	Clean URLs, editable meta tags, sitemap, schema markup, Open Graph tags.
Scalability	Comfortable with 5,000 students and 500 concurrent visitors without redesign.

10. Assumptions, Dependencies, and Risks

Type	Item	Mitigation
Assumption	Owner will supply course content, fees, instructor bios, and logo before development of each page.	Content checklist shared in Phase 1.
Dependency	Payment gateway merchant account approval can take days or weeks.	Launch with bank transfer first; add gateway when approved.
Risk	Scope creep toward a full LMS.	Freeze V1 scope; log new ideas in the Phase 7 backlog.
Risk	Late content delivery delays launch.	Use placeholder content and swap later.
Risk	Spam registrations and fake enrollments.	Email verification, CAPTCHA, admin approval.

11. Acceptance Criteria (Definition of Project Complete)

- A new student can register, choose a course, pay, and receive confirmation without staff help.
- An admin can add a course and a batch and see them live within minutes.
- All pages work on mobile and desktop with no layout breaks.
- The site passes the security and performance checks listed in this document.
- Source code, documentation, credentials, and a short admin training guide are handed over.
