

Design Guide

Look, feel, layout, and interaction rules for the website

Project	Course Enrollment Platform (courses: Digital Marketing, SEO, Content Writing, Web Development)
Version	1.0 (Draft for developer review)
Audience	Development team, project owner, and QA

1. Design Principles

- **Trustworthy:** clean layouts, real photos, clear fees, visible contact details, and student proof (reviews and numbers).
- **Clear:** a visitor understands what each course teaches and what to do next within seconds.
- **Fast:** light pages, few animations, compressed images.
- **Mobile-first:** most students will visit on a phone, so every design starts there.
- **Consistent:** one set of colors, fonts, spacing, and components across the whole site.

2. Brand Colors

These are proposed defaults. If the institute already has brand colors, replace the primary and accent values and keep the rest of the system.

Primary #1F3A5F	Accent #0E9F8E	Highlight #F59E0B	Text #1A1A1A
Muted text #64748B	Border #CBD5E1	Surface #F1F5F9	Background #FFFFFF

Token	Use
Primary (navy)	Header, footer, headings, primary buttons, table headers
Accent (teal)	Links, secondary buttons, icons, active states, progress
Highlight (amber)	Small emphasis only: badges ("New batch"), discount tags, star ratings
Success / Warning / Error	#16A34A / #D97706 / #DC2626 for status messages and payment states
Text and Muted	Body copy and secondary information; keep contrast ratio of at least 4.5:1 on backgrounds

3. Typography

Element	Font	Desktop	Mobile
Headings (H1-H3)	Poppins (or Montserrat), Semi-bold	40 / 30 / 24 px	30 / 24 / 20 px

Element	Font	Desktop	Mobile
Body text	Inter (or Open Sans), Regular	16 px, line height 1.6	16 px, line height 1.6
Buttons and labels	Inter, Medium	15 px	15 px
Small text and captions	Inter, Regular	13-14 px	13 px

Load a maximum of two font families, self-hosted or with font-display: swap, to protect page speed.

4. Layout, Spacing, and Breakpoints

Item	Specification
Grid	12-column desktop, 4-column mobile; content max width 1200 px, centered
Spacing scale	4, 8, 12, 16, 24, 32, 48, 64, 96 px; sections separated by 64-96 px on desktop, 40-56 px on mobile
Breakpoints	Mobile 360-639 px, Tablet 640-1023 px, Desktop 1024 px and above
Corner radius	8 px for cards and inputs, 999 px for pills and badges
Shadows	One soft card shadow, one stronger hover shadow; no heavy effects
Icons	One consistent line-icon set (e.g. Lucide or Heroicons)

5. Core Components

Component	Design notes
Buttons	Primary: navy fill, white text. Secondary: teal outline. Height 44 px minimum for touch. Visible hover, focus, and disabled states.
Course card	Image on top, category chip, title, one-line summary, duration and level with icons, fee, and a "View course" button. Whole card is clickable.
Batch card	Start date, timing, mode (Online / Onsite), seats left, and an Enroll button. Shows "Full" and a waiting-list button when full.
Form fields	Label above the field, 44 px height, clear focus ring, inline error text in red, helper text in muted color.
Navigation	Sticky header with logo, main links, Login, and an accent "Enroll Now" button. Collapses into a menu on mobile.
Tabs and accordions	Used on course pages for curriculum, FAQs, and reviews; only one open at a time on mobile.
Status badges	Pending (amber), Confirmed (green), Cancelled (red), Completed (teal), Full (grey).
Tables (admin)	Sticky header, zebra rows, search and filter bar, pagination, export button; horizontal scroll on mobile.
Modals and toasts	Modals for confirmations only; toasts for quick success or error messages, auto-dismiss after 4 seconds.
Floating actions	WhatsApp chat button bottom-right on all public pages; sticky Enroll bar at the bottom on mobile course pages.

6. Page Layouts

Home

- **Hero:** strong headline, one-line promise, two buttons (Explore Courses, Enroll Now), and a supporting image.
- **Trust bar:** numbers such as students trained, courses, years of experience.
- **Course highlights:** four course cards.
- **Why choose us:** three to four benefit blocks with icons.
- **Upcoming batches:** next start dates with Enroll buttons.
- **Instructors preview, testimonials, FAQ preview, and a final call-to-action band.**

Courses list

- Page title and short intro; search box and filters (category, level, duration) above a responsive card grid (1 column mobile, 2 tablet, 3 desktop).

Course detail

- Top: title, tagline, key facts (duration, level, mode, fee), and the Enroll button, with a banner image.
- Below: overview, what you will learn, curriculum accordion, tools covered, prerequisites, instructor card, upcoming batches, reviews, and FAQs.
- Right column on desktop: sticky enrollment card with fee, next batch, seats left, and Enroll button.

Enrollment flow

- Three clear steps with a progress bar: 1) Choose batch, 2) Your details, 3) Payment.
- Summary card always visible showing course, batch, and total fee.
- Payment step offers method choice; for bank transfer, show account details and a receipt upload field.

- Confirmation screen with next steps and a button to the dashboard.

Student dashboard

- Left menu (bottom tab bar on mobile): Overview, My Courses, Payments, Certificates, Profile.
- Overview shows enrollment status cards, next class date, and latest announcement.

Admin panel

- Left sidebar navigation; top bar with search and profile menu.
- Dashboard cards: total students, new enrollments, pending payments, revenue; a simple enrollment trend chart.
- Pending payments list on the dashboard with one-click review.

7. User Experience Rules

- Show the fee, duration, and next start date on every course card and course page.
- Ask only for the information needed at each step; keep registration to name, email, phone, and password.
- Give feedback for every action: loading indicators, success messages, and friendly error text.
- Empty states explain what to do next (for example, "You have no enrollments yet - browse courses").
- Use confirmation dialogs only for destructive or money-related actions.
- Keep the enrollment path under three clicks from any course page.

8. Imagery and Tone

- Use real photos of classes, instructors, and students where possible; avoid obvious stock photos.
- Illustrations and icons follow a single style. Images are WebP, sized per breakpoint, with alt text.
- Voice: friendly, professional, and encouraging. Short sentences, active voice, and no jargon without explanation.
- Buttons use action words: Enroll Now, View Course, Download Receipt.

9. Motion and Interaction

- Subtle only: 150-250 ms transitions on hover, focus, and accordion open.
- Respect the reduced-motion setting of the device.
- No auto-playing carousels or sound; if a slider is used, it must be swipeable and pausable.

10. Accessibility Checklist

- Color contrast of at least 4.5:1 for body text and 3:1 for large text and UI elements.
- All interactive elements reachable by keyboard with a visible focus outline.
- Semantic HTML (header, nav, main, footer) and correct heading order.
- Form fields have labels; errors are announced and not shown by color alone.
- Touch targets at least 44 by 44 px; text can be zoomed to 200% without breaking layout.

11. Design Deliverables Expected

- Wireframes and high-fidelity mockups (mobile and desktop) for all pages listed above
- Component library and style tokens (colors, fonts, spacing) in Figma and in code
- Clickable prototype of the enrollment flow
- Exported logo, favicon, and social-share image
